

Dr Tenpenny
Virginia Department of Health
mailed this to my practice.

As you can see, they now
want you to report "reasonably
suspected flu," even if no testing
is performed.

This will increase the
over-all "flu cases," which will
be used to push the vaccine.

Fear tactic's!

The data is not accurate
but will be used to scare
people.

~~Concerned~~ Pissed-off
Health Care
Worker.

Thank You
for All you do!
Keep spreading
the truth!
God Bless!
